

AUTO ACCIDENTS

They happen everyday. Finding the right place to answer your questions and care for your injuries can be a difficult task!

BODE CHIROPRACTIC ACCIDENT & WELLNESS CENTER

Injuries from auto accidents can vary, and so can the therapies used to treat them. At Bode Chiropractic we are experienced in all areas of auto accident rehabilitation and recovery. We are a local doctor's office, not a large chain, so you can expect individual medical attention for your injuries.

WHAT DO I DO?

Most of us have no idea what to do after an accident. Bode Chiropractic is here to help.

Our professionally trained staff will help answer all your questions concerning your injuries, getting your car fixed, even help finding an attorney if necessary.

We take pride in guiding you through the entire process and helping you achieve full physical and financial restitution.

WHAT INJURIES DO YOU TREAT?

At Bode Chiropractic we treat the entire body, not just the spinal injuries. By utilizing different types of therapies we are able to care for a wide range of injuries. Our specialties are:

- **Whiplash**
- **Disc Injuries**
- **Pinched Nerves**
- **Numbness**
- **Sciatica**
- **Headaches**
- **Torn Muscles / Ligaments**
- **Nausea / Dizziness**
- **Nutrition / Weight Loss**

Treatment for these problems and others has allowed Bode Chiropractic to become a respected leader in patient therapy and recovery.

A bilingual staff including a Chiropractic Assistant, a massage therapist and an insurance/billing expert help to make things as easy as possible for you, our patient.

We also offer extended hours and transportation, if needed. We truly care for our patients and do our best to treat you with a "family touch".

FULL INJURY TREATMENT

X-RAY

Documents the extent of skeletal injuries and allows for proper diagnosis. This will facilitate treatment plans and therapies best suited for the injury.

ELECTRICAL STIMULATION

Small electrical impulses applied to the area of injury. Relieves pain, reduces swelling, promotes muscle tone and stimulates endorphins to suppress pain naturally.

INTERSEGMENTAL TRACTION

Passive motion into the spinal region, stretching spinal joints and increasing mobility.

MASSAGE

Eliminates chronic muscle spasms, reduces scar tissue formation, promotes better circulation, and increases range of motion.

SUPERFICIAL HEAT / CRYOTHERAPY

Application of hot or cold packs to increase circulation, relax muscles, and reduce joint stiffness.

TRIGGER POINT THERAPY

Compression of muscles with sustained pressure to relax the affected area.

CHIROPRACTIC MANIPULATION

Restores alignment to the spinal joints as well as the extremities to achieve proper function and pain relief.
